
ABRISO JIFFY NOVOSTRAT ACQUISITION

A NEW CHAPTER FOR ABRISO JIFFY

In the exciting start of a brand-new era, we're delighted to announce our acquisition of Novostrat, a Europe-leading manufacturer of sustainable polyethylene foam. With sites in Poland and Ireland, Novostrat's commitment to quality, service and above all sustainability mirrors our own and we know this new era will mark the start of even greater Europe-wide achievements in our field.

ADDING MORE EXCELLENCE TO OUR TEAM

Built on an ethos of creating, sustaining and protecting, not just for our customers but for our planet, Abriso Jiffy has spent more than 50 years building the right team of experts to offer great service, impeccable quality and marketing-leading sustainability. And now, by adding the Novostrat knowledge and expertise to ours, our team has become even stronger.

BUILDING SOMETHING GREAT

Having been in operation for over 50 years, we've kept our place as market-leaders by constantly investing in innovation, technology and people. Adding companies including Jiffy, Airpack and Tap to our team as we've grown, we now have over 5000 customers and 15 production sites across 35 countries.

And with Novostrat now a part of the next Abriso Jiffy chapter, our bigger, stronger team can go on to build even greater things – for our customers, for our industry and for our planet.
